1-7. (cancelled)

8. (previously presented) A method of selecting an acoustic model for a voice command application executing on a voice command platform, comprising the steps of:

providing a plurality of acoustic models;

providing said voice command application with a Voice Extensible Markup Language (VXML) root document having metadata commands for specifying a particular acoustic model from said plurality of acoustic models; and

selecting said specified particular acoustic model for use by said voice command application.

9. Cancelled.
